Model Kit POL806

tlhIngan maH! (We are Klingons!)

The Klingons (known in the Klingonese language as "tlhIngan") are a humanoid warrior species originating from the M-class planet Qo'noS (pronounced "Kronos"). One of the major powers in the Galaxy, the Klingon culture has created an interstellar military force to be respected and feared.

The Klingon D7 Battlecruiser is by far the most stalwart design and a symbol of Klingon military power in the second half of the 23rd Century. The D7-type vessel is almost predatory in its appearance, with a spread-wing main hull, long neck and head-like command pod. The D7 Battlecruiser has gained a level of fame equal to that of Starfleet's Constitution-class Starships.

Polar Lights presents the Klingon D7 Battlecruiser Snap Together Model Kit. With more than 35 highly-detailed pieces, this is an exacting replica of the original Klingon ships from *Star Trek*.

STICKERS - DECALS

This kit provides stickers for the modeler who is not comfortable with water-slide decals. If you do not wish to apply every tiny detail, simply apply only the larger elements of the sticker sheet. There is an optional sheet of water-slide decals for the advanced modeler.

Choose the ship you wish to build, then follow the placement diagram working systematically to place each element as shown. The sticker/decals provided allow options to build one of four different vessels. There are two versions of the Klingon D7 Battlecruiser as well as two versions of a Romulan vessel.
